

Filoger Comprehensive Python For Al Course 2024

Exercises 9 && 10

Deadline: 2024 12 September

Score: 600 + 100(GitHub)

Wednesday - 2024 04 September

Exercises 5

Deadline: 2024 15 August

Score: 300 + 50(GitHub)

Wednesday - 2024 04 September

Question 01 (tuple)

Create a Python program with below details:

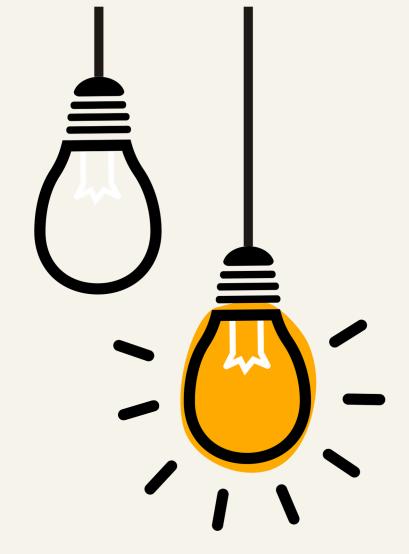

- Input a count of students.
- Collect each student's unique ID, name, and score into tuples.
- Store these tuples in a list.
- Input a name to search the list.
- Display the matching student's details, if found.

Question 02 (set)

Given two lists: list I = [1, 2, 3, 4, 5, 6, 6, 7] and list I = [5, 6, 7, 8, 9], write a program to create a list that contains only the unique elements from both list I = [1, 2, 3, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 6, 7] and I = [1, 2, 4, 5, 6, 7] and I = [1, 2, 4, 5, 6, 7] and I = [1, 2, 4, 5, 6, 7] and I = [1, 2, 4, 5, 6, 7] and I = [1, 2, 4, 5, 6, 7] and I = [1, 2, 4, 5, 6, 7] and I = [1, 2, 4, 5, 7] and I = [1, 2, 4, 5, 7] and I = [1, 2, 4, 4, 5, 7] and I = [1, 2, 4, 5, 7] and I = [1, 2, 4, 4, 5, 7] and I = [1, 2, 4,

Question 03 (set)

Given a list items containing strings (filenames with extensions) and integers, write a Python program to extract and display the unique file extensions from the filenames in the list. Non-string items should be ignored.

Exercises 6

Deadline: 2024 15 August

Score: 300 + 50(GitHub)

Wednesday - 2024 04 September

Question 01 (copy)

Given dictionary books with book titles and their authors, perform the following:

```
books = { "Book1": {"title": "Learn Python", "authors": ["Author A", "Author B"]}, "Book2": {"title": "Al Basics", "authors": ["Author C"]} }
```

Shallow Copy Experiment:

- Make a shallow copy of books.
- •Add "Author D" to "Book!" in this copy.
- Compare changes in the original dictionary.

Deep Copy Experiment: ·Create a deep copy of books.

- ·Add "Author E" to "Book!" in the deep copy.
- •Discuss differences observed between the shallow and deep copy results.

Question 02 (ErrorHandling)

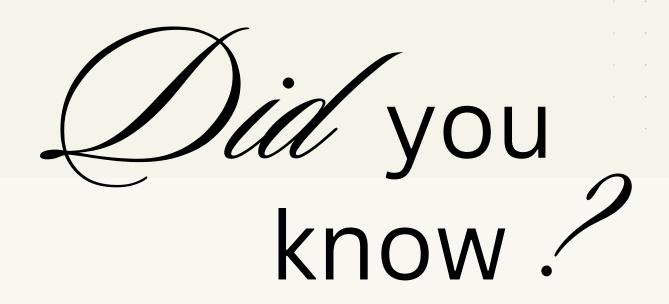

Which type of error can't handle by "Try, Except"? Give an example

Question 03 (ErrorHandling)

Manage the errors of the following codes.

```
sum = 8
numbers = [10, 12, 13]
res = sum(numbers)
print(res)
```

```
numbers = [2, 3, 10, 23]
numbers.remove(300)
print(numbers[8])
```

You automatically lose the chances you don't take. Trust yourself. You can do this.

Don't give up on your dreams:)
